What day(s) are they planning to do the radiological screening (i.e. walk the cleared alignment with a scintillation detector) and who should I contact when I arrive at the site?

**Subject:** RE: West Lake fence installation schedule

We are still planning on starting the fence installation work tomorrow. The contractor anticipates that it will take about 20 days. He is planning on working straight through until it is completed. Bob will be on site tomorrow and Thursday to kick off the work. Mike Bollenbacher is also scheduled to be onsite tomorrow and Thursday.

Paul,

Can you or Bob give me an update on the fence installation schedule? I would like to coordinate our observation of these field activities.

Thanks,
